# **WEATHER OF CONCERN**

## **NORTHERN CALIFORNIA**

- A Winter Weather Advisory remains in effect above 5,500 feet in Western Plumas county and above 6,000 feet in the Northern Sierra Nevada through Sunday afternoon.
- Continued fluctuations along the Lower Sacramento River System. Minor flooding will continue for some locations including Clear Lake and Lakeport.
- Additional snow accumulations of 3 to 9 inches will be possible with local amounts up to 15 inches.
- Next storm impacts the region Tuesday night through Friday with periods of valley rain, mountain snow, and gusty winds.

## **SOUTHERN CALIFORNIA**

- Showers will continue this afternoon and evening behind today's cold front passage, becoming scattered to isolated overnight through Sunday.
- Drier conditions are expected Monday.
- Another storm system will likely bring rain to the region Tuesday through Wednesday, with showery conditions possibly through Friday. Below normal temperatures will continue through the period.

# **WEATHER KEY POINTS**

**03/03/19 - 03/09/19**

## **Sunday – Lingering precipitation**

- Showers will linger across the state Sunday, especially in the Sacramento area, along the Sierra, and in far northern California.
- Impacts are generally expected to be minimal, though travel concerns will persist due to snowfall in the mountains.

## **Monday – Break in storms**

- A break from rainfall is expected on Monday between storm systems.

## **Tuesday-Wednesday – Next storm**

- This next system looks wetter than the weekend storm, with moderate to heavy rainfall expected at times.
  - This will likely be another statewide storm, and could once again produce travel impacts, small stream/river flooding, urban flooding, and a chance of debris flows on recent burn scars.
  - Almost the entire state is expected to receive 1-3" of rain, and so impacts could be spread across much of the area.
  - That said, the heaviest precipitation is currently expected from the Bay Area southward.

## **Thursday-Friday – Lingering showers**

- Generally lighter precipitation may continue to linger through the end of the week, especially in the Sierra.
- Colder air is expected to move into the region, leading to lowering snow levels and cooler temperatures.
